Hi Dan,

I will be leaving for Australia to visit my wife's family for a few weeks, but Josh and Wally will be here if E & E ever comes to drill holes. They can be reached at our office # 360 377-4457

thanks,
Trip

Trip,

I was just informed by EPA and EPA's Contractor, Ecology & Environment, Inc. that they will be rescheduling their field work that was anticipated to begin next week. The brief reason for the reschedule was that the analysis laboratory was at its capacity.

I'm presently waiting for EPA/E&E updated schedule as a result and will inform you as soon as I receive it.
